

IN THE ABSTRACT:

Please correct the Abstract as follows. A clear copy of the amended Abstract is submitted with this amendment on a separate sheet:

— — Abstract

~~The solution~~ The invention concerns reactive polymers and copolymers based on N-(2hydroxypropyl) methacrylamide, which contain reactive thiazolidine-2-thione groups in side chains of the polymers or at the ends of polymer chains. The solution also includes a method of their preparation and their use for synthesis of polymer drugs and conjugates with proteins and preparation of gene delivery systems. — —
